

# **CIMEA Diplome Platform: A Holistic Approach to Recognition through Digitalization**

*Luca Ferranti, Project Manager of the Digital  
Transformation Unit and Senior Credential Evaluator*

*Matteo Testa, Project Manager of the Digital  
Transformation Unit and Senior Credential Evaluator*

# ONE-STOP SHOP

All You Need,  
All in One

## Unique place for CIMEA staff

Different profiles for Credential Evaluators based on their job positions (Administrator-Senior-Junior)

Interaction among Credential Evaluators for correction of evaluation Statements and internal chat

Interaction between Credential Evaluators and Scan Department

Interaction between Credential Evaluators and Applicants through a dedicated message section

---

## Unique place for Applicants

Access to all the relevant information through FAQs, Required Documents, Consent Form, T&C and a dedicated Diplôme website

Interaction with CIMEA's Credential Evaluator through a dedicated chat and with Diplôme's Customer Service

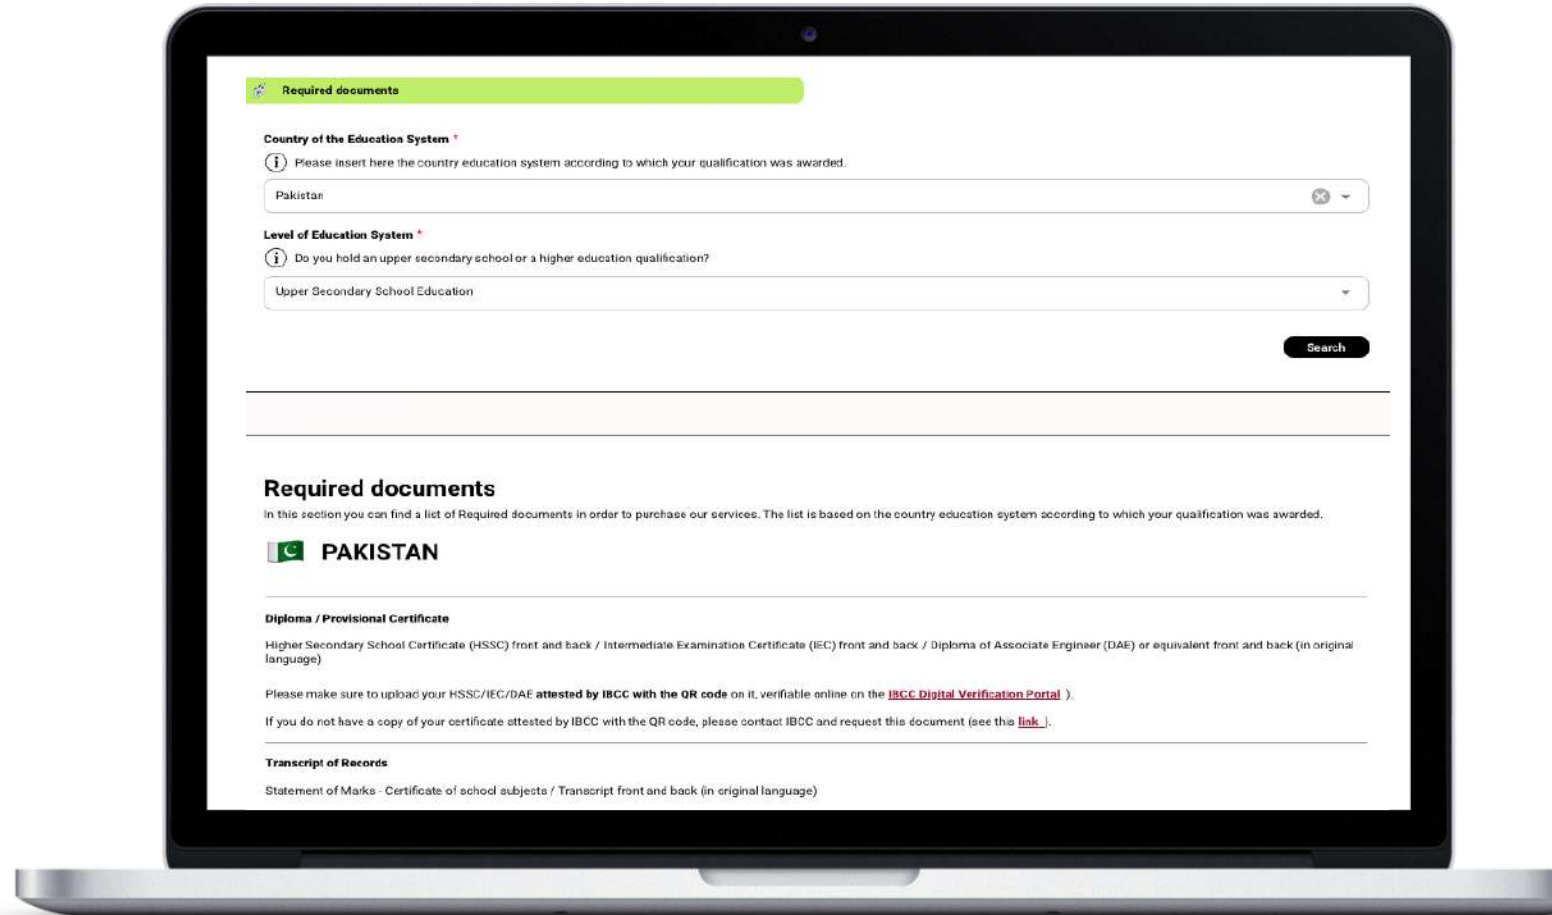

Access to the Automatic Recognition Database Italia (ARDI) for the relevant country

Possibility of appealing CIMEA's evaluation, sharing the Statement with third parties and retrieving useful administrative documents (invoice, waybill).

# CIMEA- Diplome website

A dedicated website is available with thorough information about the CIMEA-DiploMe services, and specifically about:

- Required Documents
- ARDI
- CIMEA's LRC-based evaluation methodology
- CIMEA for Refugees service
- FAQs

## Front end for applicants

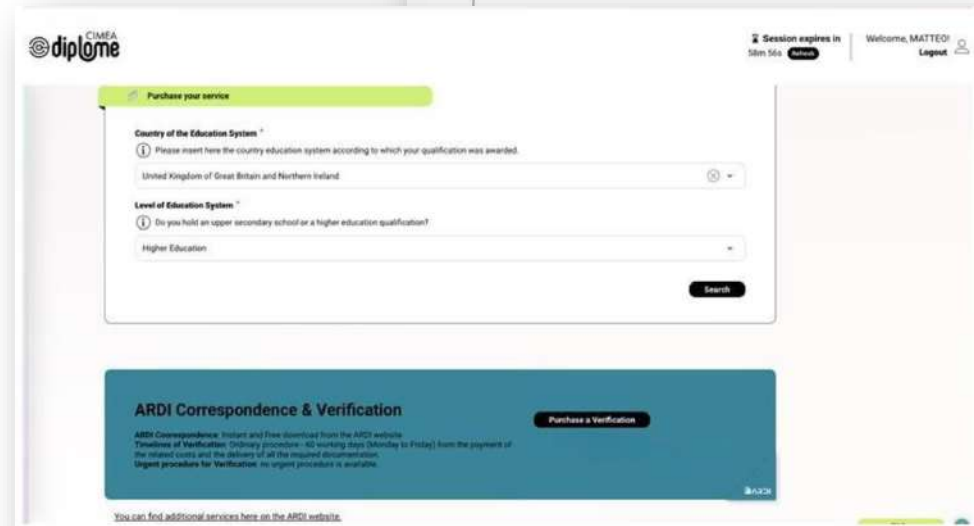

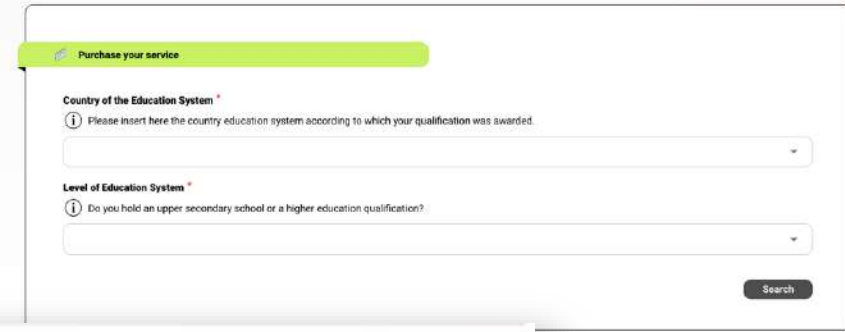

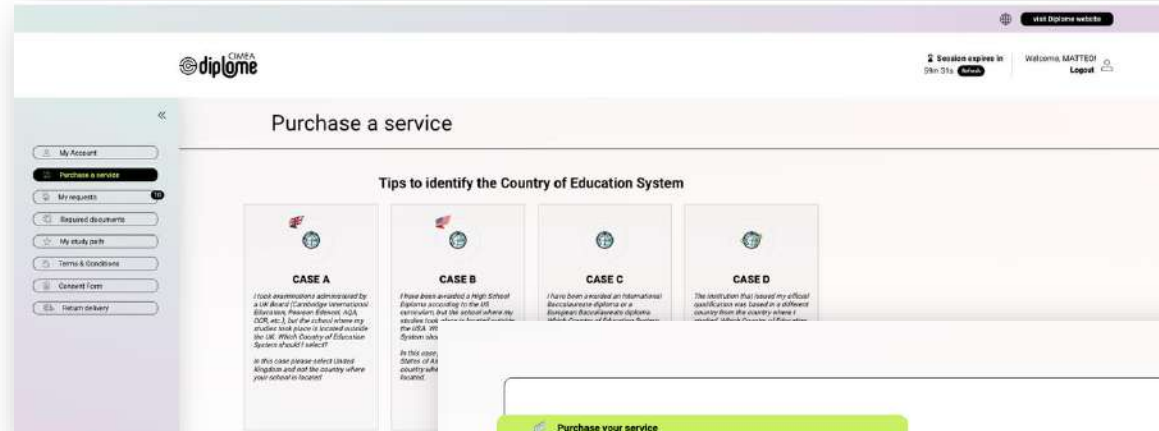

# Diplome FrontEnd for applicants

Diplome's homepage offers a user-friendly interface for applicants which need our services.

On the "**Purchase a Service**" page, users are guided through a clear decision-making process to identify the appropriate **Country of Education System** using illustrated case scenarios which clarify how to proceed when the place of study differs from the curriculum or issuing institution.

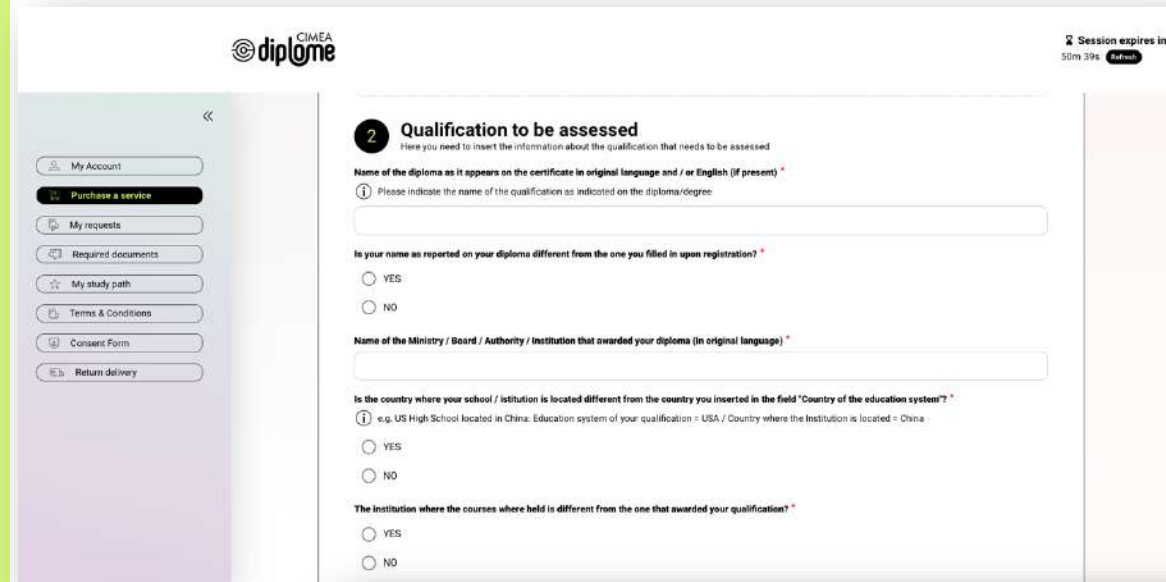

Once the country and level of education (e.g., secondary or higher education) are selected, the platform displays the relevant service available.

# Diplome Qualification to be assessed

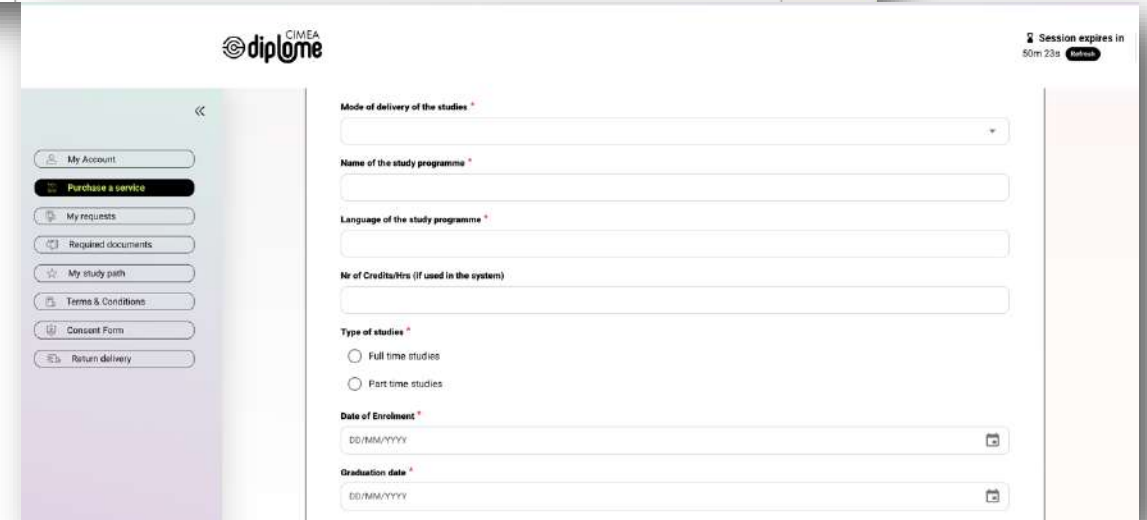

In the second step of the request process, the applicant is required to enter **detailed information about the qualification** to be assessed.

This step is essential for ensuring the accuracy and speed of the recognition procedure.

The screenshot shows the 'Qualification to be assessed' step of the application process. The interface includes a sidebar menu with options like 'My Account', 'Purchase a service', 'My requests', 'Required documents', 'My study path', 'Terms & Conditions', 'Consent Form', and 'Return delivery'. The main content area is titled '2 Qualification to be assessed' and contains the following fields and questions:

- Name of the diploma as it appears on the certificate in original language and / or English (if present) \***  
Please indicate the name of the qualification as indicated on the diploma/degree.
- Is your name as reported on your diploma different from the one you filled in upon registration? \***  
 YES  
 NO
- Name of the Ministry / Board / Authority / Institution that awarded your diploma (in original language) \***
- Is the country where your school / institution is located different from the country you inserted in the field 'Country of the education system'? \***  
e.g. US High School located in China. Education system of your qualification = USA / Country where the Institution is located = China  
 YES  
 NO
- The institution where the courses were held is different from the one that awarded your qualification? \***  
 YES  
 NO

The screenshot shows the 'Mode of delivery of the studies' step of the application process. The interface includes a sidebar menu with options like 'My Account', 'Purchase a service', 'My requests', 'Required documents', 'My study path', 'Terms & Conditions', 'Consent Form', and 'Return delivery'. The main content area contains the following fields and questions:

- Mode of delivery of the studies \***
- Name of the study programme \***
- Language of the study programme \***
- Nr of Credits/hrs (if used in the system)**
- Type of studies \***  
 Full time studies  
 Part time studies
- Date of Enrolment \***  
DD/MM/YYYY
- Graduation date \***  
DD/MM/YYYY

# Diplome Required Documents

In the final step of the recognition request process, applicants are required to **upload a specific set of documents**, which vary depending on the **country of the education system**.

Importantly, the list of required documents is provided **in both English and the original language** of the country to ensure clarity and accuracy for applicants.

## Required documents

Below you will find a list of documents required in order to evaluate your qualification.

N.B.: For Upper Secondary School Education: if you followed an international curriculum, we invite you to select and read the Required Documents for the corresponding country of the education system (e.g. United Kingdom, United States, International Baccalaureate etc.).

For Higher Education: if you earned a degree belonging to an education system of a different country from where you studied, be sure to select and read the Required Documents for the corresponding country of the education system (e.g. United Kingdom, United States etc.).

If the institution where the courses were held differs from the one that awarded your degree, please note that CIMEA will verify the official accreditation/recognition status of both institutions (Awarding and Teaching Institution) in the respective countries of reference. For further information, please read carefully [CIMEA Evaluation Methodology](#).

CIMEA experts reserve the right to request further documentation (including original or official documents in sealed envelopes) - even if not specified in the Required Documents - when they consider it important for the evaluation of your dossier at any time during the processing of your request. Therefore, you should be prepared to submit them if asked to do so.

The delivery of original/official education documents, unless explicitly requested in the application, is not required. If you are required to send a paper document delivered to CIMEA, CIMEA is not responsible for any delays. Application ID can create delays.

For any other information please refer to the [FAQ](#).

## KAZAKHSTAN

### ID Card/Passport

ID Card / Passport

Mandatory

### Consent Form

Consent Form

Mandatory

### Diploma / Degree / Provisional Certificate

Please upload this document in original language

Mandatory

### Transcript / Academic Record

Addendum to the Diploma / Diploma Supplement (Дипломға қосымша - Diplomǵa qosymsha / Приложение к диплому - Prilozhenie k diplomu) in original language, including all the pages and the list of exams with their respective grades (and credits, if applicable).

Mandatory

If the Degree is not accompanied by an Addendum to the Diploma / Diploma Supplement (Дипломға қосымша - Diplomǵa qosymsha), please alternatively upload the Выписка из зачетно-экзаменационной ведомости (Extract from the Academic Record).

### Translation

Translation in English or Italian (only if the official education documents are not in English)

Mandatory

Please ask the institution that awarded your degree to send to CIMEA by post an attested copy of your education documents (diploma and transcript) in a sealed envelope for the verification service to the following address:  
Associazione CIMEA, Viale di Villa Massimo 57 - 00161 Rome (RM) - Italy.

Please note that there are certain requirements for the delivery of official documents in sealed envelopes: before arranging any delivery, please be sure to have read and understood all the information below.

For attested copies in sealed envelopes we mean an attested copy with an original institutional seal and signature(s). Please bear in mind that such official documents should be issued and signed/stamped by the same office that issues original documents. Please note that simple photocopies, notarized copies, translations or scans are not considered official documents.

The envelope should be sealed by the issuing authority with a seal, stamp, and signature of an official on the back flap. The official documents in sealed envelopes can be sent to CIMEA by mail or courier service either by the issuing authority or by the applicant, but must arrive sealed. If the envelope is opened or there is no stamp or signature across the back flap, CIMEA cannot accept the document.

# Dashboard for Credentials Evaluators

## Workflow Management

The platform's back office is designed to maximise user-experience and user-efficiency, helping the Credential Evaluator to better manage their daily workload and allowing for significant time-savings throughout the whole workflow.

The Home Page provides a structured overview of the open tasks and ad-hoc filters help the Credential Evaluators to select the cluster of applications they wish to work on in a specific time frame, e.g. sorting them by country, level of education and expected deadline.

The CIMEA-Diplome platform ensures accurate and structured management of both documents and data.

All documents and data processed within the system are not handled solely for the purpose of issuing Statements. Each item is reviewed and validated by credential evaluators, becoming an integral part of the evaluation process.

This approach allows the evaluation activity itself to continuously enrich and consolidate structured databases, ensuring high data quality, consistency, and long-term value for institutional knowledge.

#3

A restricted area has been created specifically for Italian HEIs where they can monitor the status of the application of their prospective students and download the Statements when available.

This helps streamline CIMEA-HEIs interactions and counter document fraud.

# **CIMEA Diplome Chain: A Blockchain-Based Consortium**

# The CIMEA Diplome Chain for Institutions project

The CIMEA Diplome Chain project represents an innovative technological and institutional initiative aimed at enhancing the reliability, transparency, and security of academic certificates issued by Italian and foreign universities and institutions. Promoted by CIMEA, the project seeks to establish a decentralized consortium of blockchain nodes, in which each university or institution actively participates in the network through one or more nodes.

# A Secure Network for Verification

The consortium-based blockchain network serves as a **guarantee mechanism** for academic certificates, providing a **shared, secure, and immutable system** for the verification of academic credentials. Each node, operated by an individual institution, contributes to the governance of the network and to the preservation of trust in the certification processes, effectively preventing duplication and fraud. Furthermore, the decentralized nature of the network enhances the system's resilience and ensures that no single entity holds exclusive control over the platform.

NOTE VALUTATIVE

Il Bachelor of Science in Mechanical Engineering è titolo finale di primo ciclo del sistema della formazione superiore pakistano che consente in loco l'accesso ai corsi di secondo ciclo. In Italia tale qualifica è comparabile per livello a una Laurea (triennale) e consente l'accesso ai corsi di secondo ciclo.

CIMEA - [www.cimea-diplo.me.it](http://www.cimea-diplo.me.it)
Pagina 3/1

CIMEA - Centro di Informazione sulla Mobilità e la Equivalenza Accademica svolge dal 1994 la propria attività di informazione e consulenza sulle procedure di riconoscimento dei titoli di studio e sui loro collegi, all'interno di formazioni superiori italiane e internazionali. CIMEA è centro italiano ufficiale aderente alla rete NARIC - National Academic Recognition Information Centres dell'Unione Europea e alla rete ENIC - European National Information Centres del Consiglio d'Europa e dell'UNESCO, in applicazione dell'Articolo 18.2 della Convenzione sul riconoscimento dei titoli di studio relativi all'Insegnamento superiore nella Regione europea (dalla Convenzione di Lisbona). CIMEA ha, in quanto, le attività di Centro nazionale di informazione sulle procedure di riconoscimento dei titoli vigenti in Italia, sul sistema italiano della formazione superiore e sui titoli presenti a livello nazionale.

Per l'importazione del titolo di studio in riferimento al ciclo del Processo di Bologna e ai livelli del Transfer Qualification Framework, tale comparazione non valida in alcun modo il riconoscimento formale del titolo all'interno del sistema italiano e non vincola le istituzioni presso cui procedure di valutazione e di riconoscimento, il presente attestato non vincola in alcun modo l'istituzione, nella qualità soggetta alla valutazione.

# Fast Verification

The Official

CIMEA Guarantee of Authenticity

With every certificate issued, **Diplome** provides you with an additional layer of protection: **Fast Verification**.

Inside the certificate PDF, you will find a **dynamic link** and a **QR Code** that will both take you directly to the dedicated **Fast Verification** page — the core of our authentication system.

### CIMEA Fast Verification

In this tool you can check if your certificate is true and compliant with the data that CIMEA has saved in his security systems. You will have three levels of verification: the first one is a manual check between the certificate data and the informations in this page, the second is an automatic check of the PDF file and the third one is the transaction hash created in our blockchain.

**1 Attestato di Comparabilità**

In this section it is possible to check that the metadata displayed in the Statement are the same that CIMEA has saved in its Fast Verification system.

--------------------------------	---

Transaction hash

# Fast Verification

## Here you can:

- **View the official certificate data:** instantly compare the information shown in the PDF with the official data notarized on the blockchain. Even if someone attempts to modify the file, the official data will always remain the one securely stored in our system.
- **Verify the document's integrity:** upload your PDF file into the dedicated section and check the document's hash. In just a few seconds, you will know whether the file you hold is exactly the one officially issued by CIMEA, without any alterations.
- **Check blockchain notarization:** thanks to a direct link to the **Blockchain Explorer**, you can view the transaction that recorded your certificate on **CIMEA Diplome Chain**, along with all the essential certificate details.

# Fast Verification

With **Fast Verification**, every Diplome certificate is more than just a document — it is **trusted digital proof**, certified by CIMEA and secured through blockchain notarization.

No possibility of tampering. No doubts about authenticity. Only guaranteed security, wherever you are, whenever you need it.

**Diplome's Fast Verification: your security, our signature.**

# Main Objectives of the Project

-  **Security and Transparency:** to provide stakeholders with an immutable and verifiable system for the validation of academic certificates.
-  **Institutional Collaboration:** to foster cooperation among universities and institutions through the adoption of shared technologies.
-  **Technological Innovation:** to implement cutting-edge blockchain solutions, contributing to the digital transformation of the education sector.

# CIMEA Diplome Chain for Institutions

# What is CIMEA Diplome Chain for Institutions?

CIMEA Diplome Chain for Institutions is the proprietary platform that allows you to securely, transparently, and immutably certify any digital PDF document using blockchain technology.

- It provides undeniable proof of the file's existence at a specific date.
- It ensures the integrity of the content, without ever saving or exposing the original document.
- Notarization is simple and immediate: no technical skills are required, just upload the PDF of the document to be certified.
- It is based on the permissioned DiplomeChain blockchain infrastructure, designed for reliability and security.

# Different User Roles and Permissions

Each institution has its own dedicated account, within which an institutional manager is designated. In their account, the manager has access to a dashboard where they can:

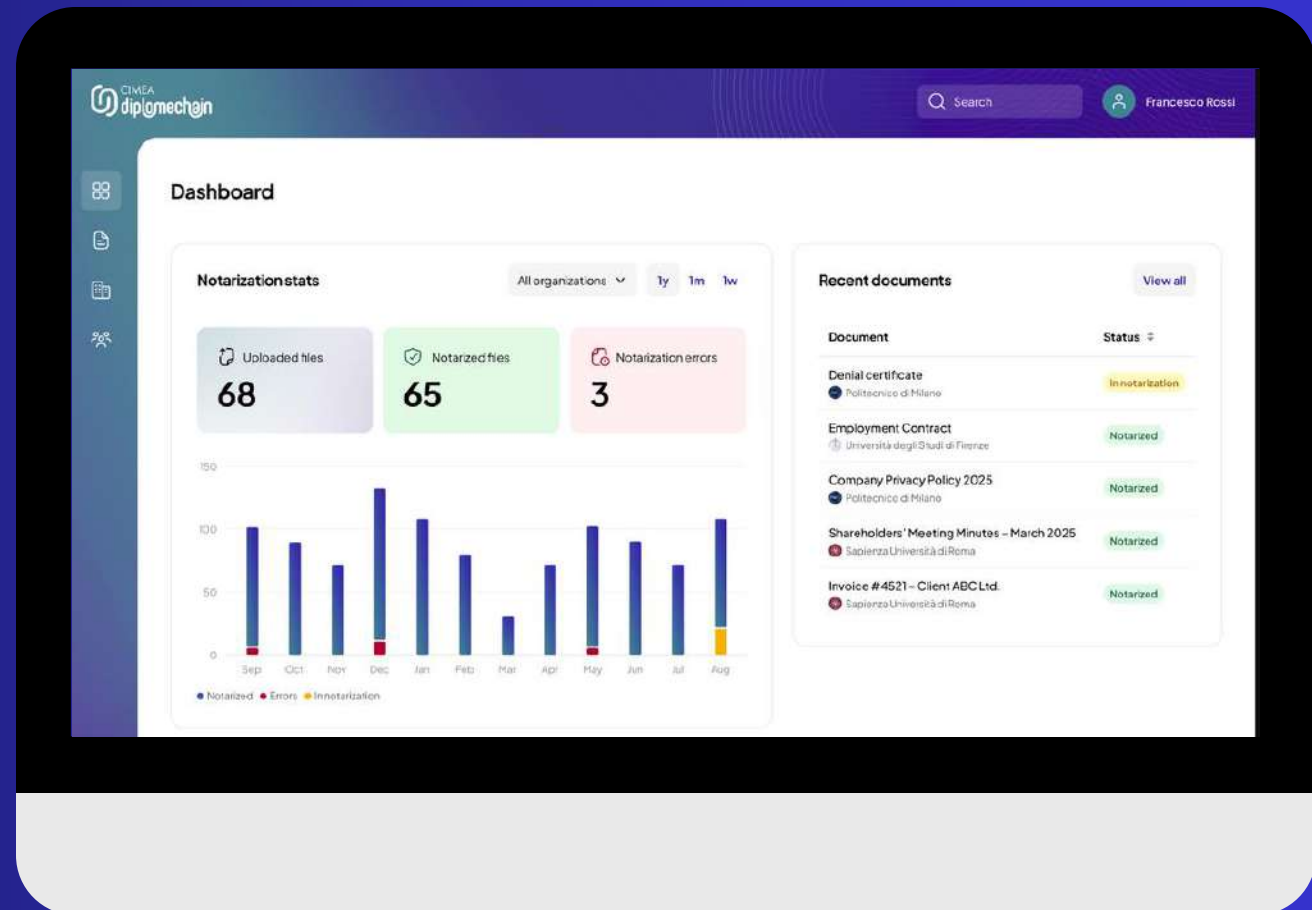

Directly perform notarization operations.

View all documents published on the blockchain by their organization

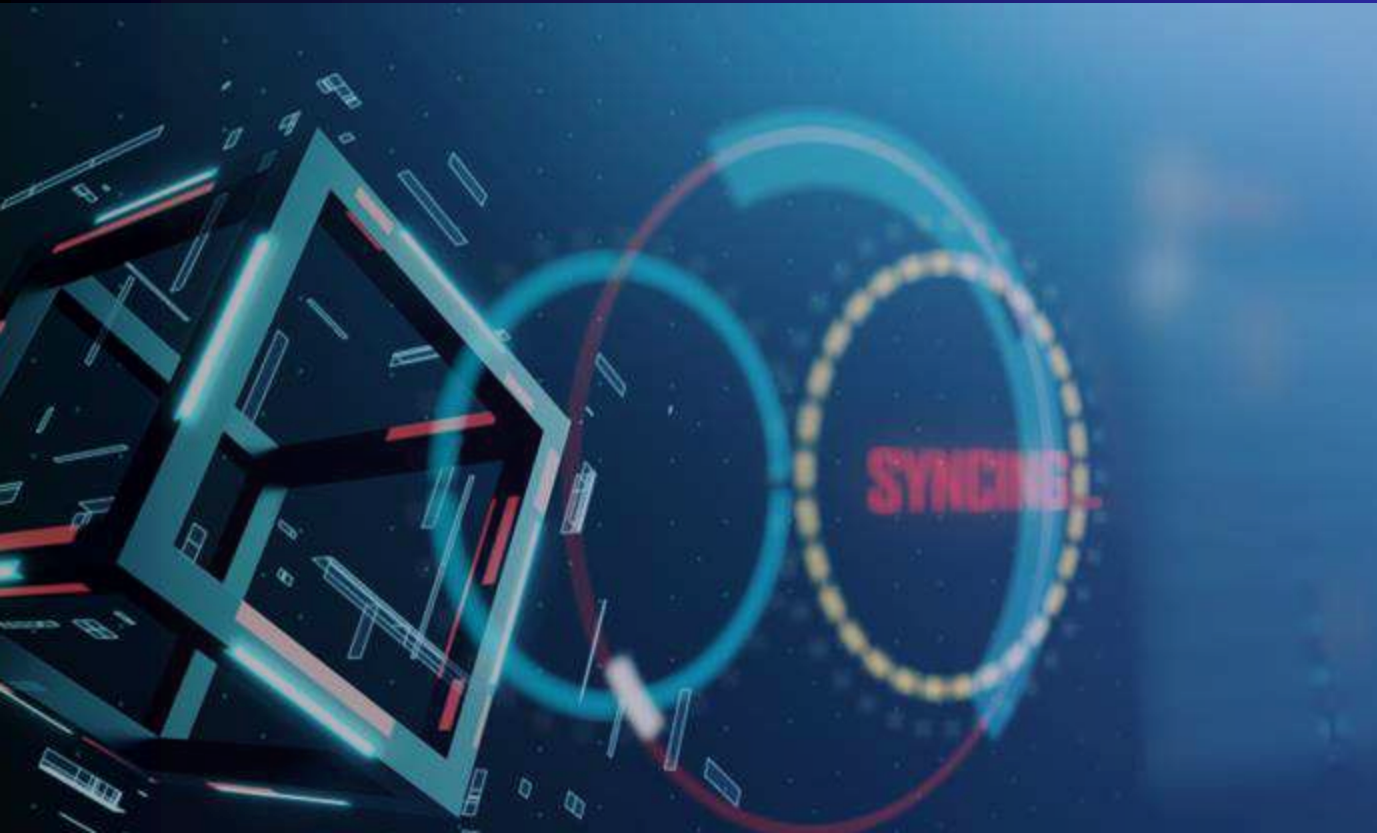

Create and manage other internal accounts

# Notarization Steps

## A clear walkthrough of how the notarization process works

### Process Start

The process begins with an easy-to-use button that opens a specific window for the user.

### Uploading Documents

Users can upload one or more PDF files by dragging and dropping them or choosing the files directly.

### Hash and Notarization

A hash of the document is generated and recorded on DiplomeChain, ensuring certification without storing the original file.

# Public Verification

Every institution, organization, authority, and employer can access the public verification area of the platform.

When the document is uploaded for verification, the system generates its hash and checks it against those stored on DiplomeChain.

If a match is found, the system displays:

- the institution that notarized the document
- the certified hash
- the notarization timestamp
- the metadata associated with the document

# Key Benefits

## Security by Design

- No files are ever stored: only the hash is sent to the blockchain.
- Privacy-first architecture with full data minimization.

## Immutability, Transparency, and Trust

- Dedicated permissioned blockchain ensuring integrity, traceability, and long-term persistence.
- Open, public verification with no authentication required.
- Ideal for audits, certifications, legal processes, and academic use cases.

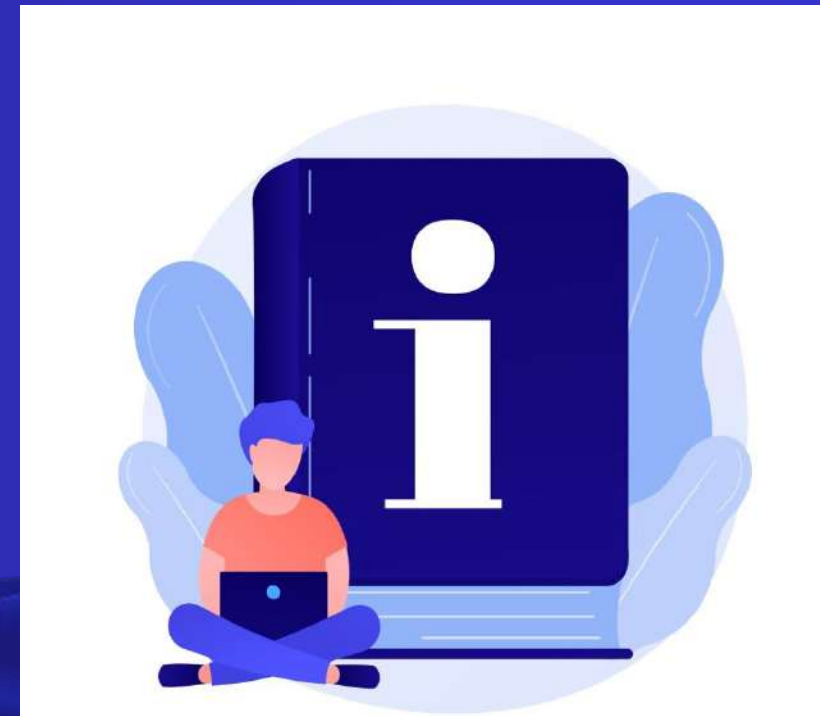

## Scalability and Integration

- APIs enabling large-scale notarization workflows.
- Reduced operational risk and standardized processes.

# Workshop – Practical Instructions

- You will now be divided into 6 groups (1 group per piloting partner)
- You will receive the credentials to access the CIMEA Diplome Chain for Institutions website via email
- Only notarize files in .pdf format
- You can notarize whatever file that has a .pdf format
- You can choose autonomously which file to notarize. Examples of documents that might be worth notarizing:
  - Final microcredential certificate;
  - Final microcredential supplement;
  - Certificate of enrollment;
  - Etc.
- Remember to give the file a clear and meaningful name.
- Link to the public verification webpage:
